

Iryna Loushkina

Junior Front end Developer (React)

👤 Profile

8+ years experience in many different projects, starting from sales / account management, implementation online booking tools to managing people.

Starting January 2020 I've been studying how to create responsive websites / small SPAs and environment connected to that process. I can deploy and maintain small projects so far.

What I mean by that? I can build websites for individuals and small business, create mobile-friendly layouts and CSS animations /effects, add dynamic page functionality, build small client-side apps with JavaScript etc.

You are more than welcome to visit my portfolio and GitHub
